

Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

Shorter waits for cancer treatment

The target is all patients, ready-for-treatment, wait less than four weeks for radiotherapy or chemotherapy. Six regional cancer centre DHBs provide radiation oncology services. These centres are in Auckland, Hamilton, Palmerston North, Wellington, Christchurch and Dunedin. Medical oncology services are provided by the majority of DHBs.

* One patient, who was ready-for-treatment, waited four weeks and two days for chemotherapy during quarter three.

Increased Immunisation

The national immunisation target is 85 percent of eight-month-olds have their primary course of immunisation at six weeks, three months and five months on time by July 2013, 90 percent by July 2014 and 95 percent by December 2014. This quarterly progress result includes children who turned eight-months between January and March 2013 and who were fully immunised at that stage.

85%

Now that the hospital target has been achieved, we are ranking DHBs against the primary care target.

Better help for smokers to quit

The target is 95 percent of patients who smoke and are seen by a health practitioner in public hospitals, and 90 percent of patients who smoke and are seen by a health practitioner in primary care, are offered brief advice and support to quit smoking.
